

# *Midterm Presentation*

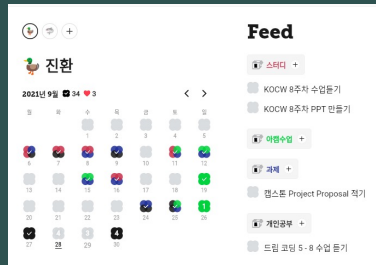

Capstone Design Project

**TEAM B**

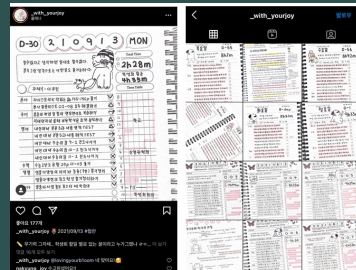

**2021.11.1**

# Objective

[ Todo Mate ]

Scheduling Function

[ Gongstagram ]

Social Network Function

Evaluation Function

## *Schedule Milestone*

### **DONE**

- 80% front-end implementation.

### **TODO**

- Database design and implementation.
- The database and the front-end link.

## *Role of each member*

---

### Front

- Jisu Kim
- Seyeon Park

### Back

- Jinhwan Kim
- Mujin Gwak

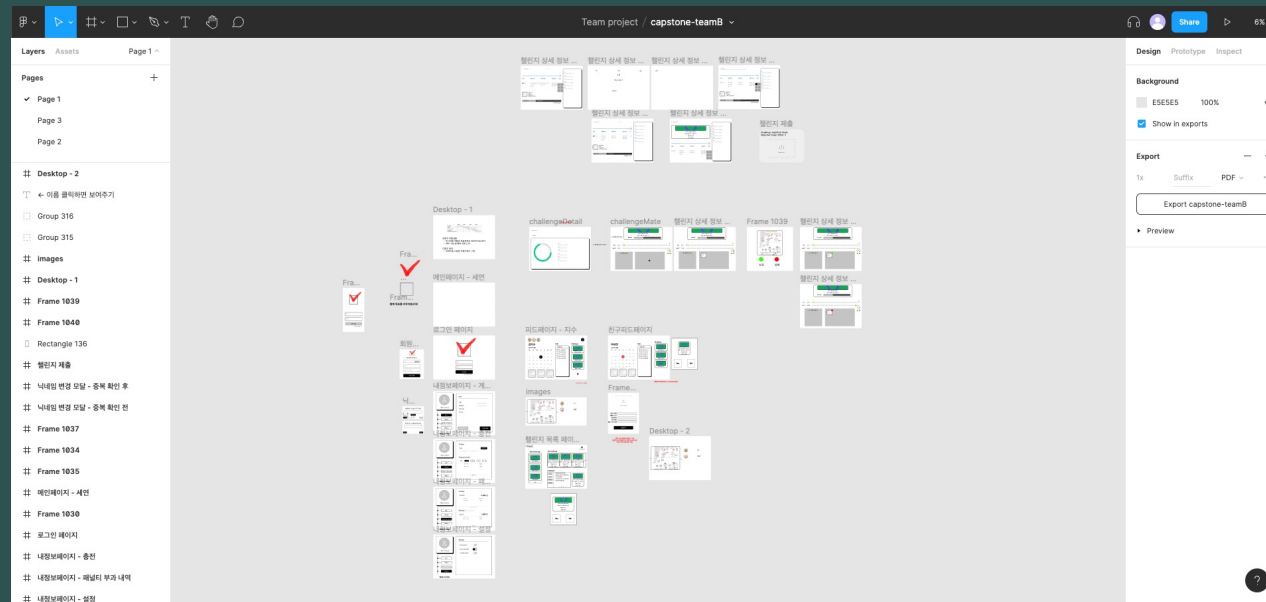

### Front & Back

- Jisu Kim
- Jinhwan Kim
- Seyeon Park
- Mujin Gwak

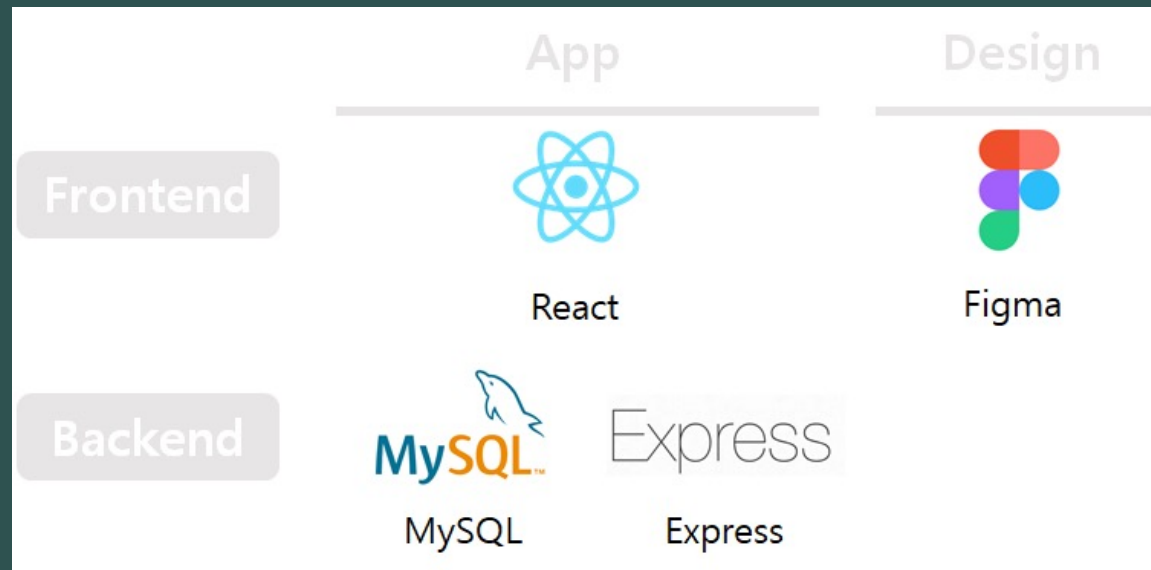

---

## Figma – Make a prototype

# *Implementation*

- Programming Language -

# *Implementation*

- Frontend -

React

```

# *Challenges*

- Development -

## Library

Implement card slider  
using the carousel library

The library was used to increase  
the efficiency of development.

## Grid, Flex layout

The screen size is different  
for each individual

Flexible screen segmentation  
using Flex layout.

# Challenges

- Function Detail -

## 1) Check the mate's challenge

When uploading a photo of day, user have to check the picture posted by mate the day before to upload it. Uploading photos is possible only on that day to prevent uploading next day.

## 2) Matching

[ even ] 1:1

[ odd ] 3 people is 1 group. (A → B → C → A)

## 3) Last day of challenge

On the last day of the challenge, just upload picture and achieve goal.

## 4) Give up challenge

If user give up the challenge, that user can't receive the Deposit that paid to enter the challenge.

## 5) Can't participate in period

## *Limitation: constraint and assumption*

---

### Operating as a point system

Implement card slider using the carousel library → The library was used to increase the efficiency of development.

### Excluding malicious user

The screen size is different for each individual → Flexible screen segmentation using Flex layout.

*Demo*
