The table in the next page contains evaluation criteria for a proposal. BG, PS, and PP represent background and related work, problem statement and proposed solution, and project planning, respectively. Please write the scores with a short description (i.e., why do you think so?) per each criterion.

Criteria	Items	Score
BG	Does the team thoroughly study prior work/approach/idea?	40/ 50
(30%)	기존 아이디어/접근방식/연구를 빠짐없이 정리했는가?	
	Does the team properly understand or classify related work?	40/ 50
	기존 아이디어/접근방식/연구에 대해 적절히 이해하고 분류했는가?	
	[Description]	80/ 100
	They did study prior work and approaches, but we thought it	
	looks difficult to apply the idea into the project. But it is really	
	challenging.	
PS	Is the proposal worth addressing?	10/ 30
(40%)	제안한 내용은 충분히 의미 있는 프로젝트인가?	
	Does the team clarify the problem?	30/ 40
	해당 팀은 문제를 명료하게 정의하고 있는가?	
	Is the proposed solution logical and practical?	10/ 30
	제안하는 솔루션은 논리적이고 실용적인가?	
	[Description]	50/ 100
	It was unclear that technical part, and the flow through the	
	project, and they didn't share their idea so we couldn't figure it	
	out that the solutions are practical.	
PP	Is it appropriate for a semester-long project as a team? The	30 / 40
(30%)	proposal must be neither too trivial nor too hard.	
	한 학기 동안 팀이 수행하기에 적절한 난이도인가?	
	Are individual roles and collaboration clearly defined?	20/ 30
	개별 역할 분담과 협업이 명료하게 정의되어 있는가?	
	Is the final product meaningful?	30/ 30
	최종 결과물이 의미 있는가?	
	[Description]	80/ 100
	They have their own idea, so if the project goes wrong or success,	
	project will be meaningful anyway. But the explanation about the	
	individual roles was not clear, and it could be hard for semester	
	long project.	
Total	BG * 0.3 + PS * 0.4 + PP * 0.3 =	68/ 100
(종합)		

Review	They didn't share their ideas, but they have their own idea and	
(총평)	the solution was challenging, so that can be meaningful anyway	
	whether project goes wrong or success.
