## **Capstone Design: Proposal Evaluation Sheet**

Date: 2021.09.23

Your Team: Fancy (F)

Team to be Evaluated: G

Team Leader: Minji Cha

The table in the next page contains evaluation criteria for a proposal. BG, PS, and PP represent background and related work, problem statement and proposed solution, and project planning, respectively. Please write the scores with a short description (i.e., why do you think so?) per each criterion.

Criteria	Items	Score
BG	Does the team thoroughly study prior work/approach/idea?	29 / 50
(30%)	기존 아이디어/접근방식/연구를 빠짐없이 정리했는가?	
	Does the team properly understand or classify related work?	28 / 50
	기존 아이디어/접근방식/연구에 대해 적절히 이해하고 분류했는가?	
	[Description]	57 / 100
	The team did not explain much about prior work or existing	
	solutions.	
PS	Is the proposal worth addressing?	21 / 30
(40%)	제안한 내용은 충분히 의미 있는 프로젝트인가?	
	Does the team clarify the problem?	26 / 40
	해당 팀은 문제를 명료하게 정의하고 있는가?	
	Is the proposed solution logical and practical?	18 / 30
	제안하는 솔루션은 논리적이고 실용적인가?	
	[Description]	65 / 100
	There are other similar services that recommend matching fashion	
	items. So, it seems that this project should have some specialties	
	that are different from other services.	
PP	Is it appropriate for a semester-long project as a team? The	39 / 40
(30%)	proposal must be neither too trivial nor too hard.	
	한 학기 동안 팀이 수행하기에 적절한 난이도인가?	
	Are individual roles and collaboration clearly defined?	25 / 30
	개별 역할 분담과 협업이 명료하게 정의되어 있는가?	
	Is the final product meaningful?	24 / 30
	최종 결과물이 의미 있는가?	
	[Description]	88 / 100
	The scheduling chart was really impressive. It was easy to	
	understand the flow of the process because they showed the	
	chart.	
Total	BG * 0.3 + PS * 0.4 + PP * 0.3 =	70 / 100
(종합)		

## Review (총평)

Overall, the presentation of the proposal was very clear and easy to understand. However, there are already other services for fashion matching system. Therefore, there should be some points of difference that can make their final product more special. Also, the criteria for determining whether the model's recommendation algorithm is successful or not are not clear yet.
